Ex.No.15	Building anonymous FTP Scanner using ftplib module
DATE:	

AIM:

To build an anonymous ftp scanner using ftplib module in python.

Introduction:

FTP Scanner:

A tool that automatically scans IPs/hosts for active FTP servers. It tests connectivity and credentials, reporting successful logins and vulnerabilities.

ftplib:

A built-in Python library for working with the File Transfer Protocol (FTP). It allows connecting to FTP servers, logging in, listing directories, and transferring files.

ALGORITHM:

1. Start.
2. Import the `ftplib` module.
3. Specify the FTP server hostname.
4. Connect to the FTP server.
5. Log in using the username **anonymous** and password **anonymous**.
6. If the login is successful:
    - Display the login status.
    - Display the server's welcome message.
    - Display the directory listing.
7. Close the FTP connection.
8. If the login fails, display an error message.
9. Stop.

PROGRAM:

```
import ftplib
def anonymous_login(hostname):
    try:
        # Connect to the FTP server
        ftp = ftplib.FTP(hostname)
        # Login using anonymous credentials
        response = ftp.login('anonymous', 'anonymous')
        print(response)
        # Check whether anonymous login is successful
        if "230" in response:
            print("\n[*] FTP Anonymous Login Succeeded.")
            print("Server:", hostname)
            # Display welcome message
            print("\nWelcome Message:")
            print(ftp.getwelcome())
            # Display directory listing
            print("\nDirectory Listing:")
            ftp.dir()
        # Close the FTP connection
        ftp.quit()
    except Exception as e:
        print("Error:", e)
        print("\n[-] FTP Anonymous Login Failed.")
# Main Program
```

hostname = "ftp.be.debian.org"

anonymous_login(hostname)

SAMPLE OUTPUT:

230 Login successful.

[*] FTP Anonymous Login Succeeded.

Server: ftp.be.debian.org

Welcome Message:

220 FTP Server Ready

Directory Listing:

drwxr-xr-x 2 ftp ftp 4096 Jan 10 2026 debian

drwxr-xr-x 2 ftp ftp 4096 Jan 10 2026 cdimage

drwxr-xr-x 2 ftp ftp 4096 Jan 10 2026 project

-rw-r--r-- 1 ftp ftp 512 README.txt

221 Goodbye.

OUTPUT:

```
Enter "help" below or click "Help" above for more information.

===== RESTART: C:/Users/REC/AppData/Local/Programs/Python/Python314/15cn.py ====
230-Welcome to mirror.as35701.net.

 The server is located in Brussels, Belgium.

 Server connected with gigabit ethernet to the internet.

 The server maintains software archive accessible via ftp, http, https and rsync.

 ftp.be.debian.org is an alias for this host, but https will not work with that
 alias. If you want to use https use mirror.as35701.net.

 Contact: mirror-admin at as35701.net

230 Anonymous access granted, restrictions apply

[*] FTP Anonymous Login Succeeded.
Server: ftp.be.debian.org

Welcome Message:
220 ProFTPD Server (mirror.as35701.net) [::ffff:195.234.45.114]

>
```

RESULT:

Thus an anonymous ftp scanner using ftplib module was built and executed successfully.
